NATIONAL GRID US
Waltham, MA

SERIES 12 ID
1-LAMP T8

National Grid uses the Finelite Breakthrough in Office Lighting strategy to achieve corporate sustainability goals and mitigate the effects of global climate change. Their LEED Platinum performance results from balanced lighting that improves the look of the space, meets human needs and leads to dramatic energy savings.

- **The lighting uses 40% less electricity than a typical commercial office building**
- **Every worker has flexible, task-oriented lighting**
- **The workspace is pleasant and inviting**
- **In this 320,000 square foot building, National Grid expects to save 800,000 kilowatt hours annually and offset 575 metric tons of CO2 equivalent**
